

February 8, 2011

Dear ACEnet Community,

My name is Tinashe Mrewa. I am a business student at Memorial University and am currently on a work term with ACEnet, in the St. John's office. My work term assignment is to create an annual report for ACEnet. ACEnet is proud to help enable ground breaking research in Atlantic Canada by providing high performance computing services and facilities. While those directly associated with ACEnet often get to see this research first-hand, we haven't always communicated these successes to our partners, stakeholders, and the wider community. This year ACEnet will publish its first annual report and we'd like your help.

The annual report will showcase the phenomenal research and innovation happening in Atlantic Canada and how ACEnet helps make this happen. I would appreciate if researchers could share any comments, perspectives, successes, and experiences that I could use, with your permission, in the Annual Report. I would be grateful if you could email me a short statement about your ACEnet-enabled research activities that includes

- your name
- your project title and field of research
- a brief motivation for your research
- how ACEnet's HPC facilities and people have helped advance this research
- any significant research results or expected future outcomes

If you would like further details about this report, please feel free to contact me.

I thank you in advance for your help. As I am working toward a deadline, a response by Wednesday, March 2, 2011 would be greatly appreciated.

Yours Sincerely,

Tinashe Mrewa
Marketing Administrator
