

Introduction

inSORS Grid is a collection of unique high-end visual collaboration tools designed to enhance communications among geographically dispersed teams. It connects conference rooms, team rooms, workstations, desktops, and laptops with complete video, audio, and data using a simple point-and-click interface. This document covers key functions and features of the inSORS Grid. Please view the help files ("F1" from any inSORS application) or contact technical support for assistance.

Training and Support

Please visit www.insors.com/support/ for troubleshooting guides and instructional videos, or press F1 with any inSORS Grid application selected to learn more about that specific application.

Three Ways to Enter a Meeting

1. Create a Scheduled Meeting

- Select Create/Edit Meetings from the IGMeeting menu
- Enter a Subject, Date, Time, and Duration and click Add Meeting
- New meetings appear in the list designated by a 5-digit meeting code
- Click EMail to send meeting invitations and VCal files to other participants
- Select the meeting and click Join to enter the meeting

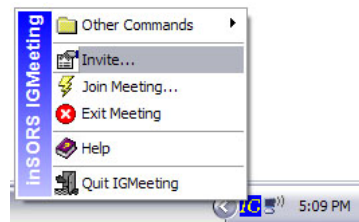

(Meetings are encrypted by default using the 5-digit meeting code. Enter a different encryption key for added security. All other participants will need to know the key you entered.)

Code	Subject	Start Time	End Time	Key
75873	Leadership Meeting	06/09/05 02:30 PM	06/09/05 04:30 PM	75873

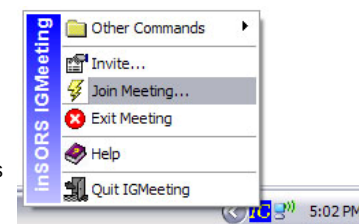

2. Invite Users to New or Current Meeting

- Select Invite from the IGMeeting menu
- Select one or more users from the list (hold down ctrl to select multiple users), enter an Invite Subject and click Invite
(Black=Available, Red=Away, Blue=In a Meeting)
- When you are invited to a meeting, you can accept, decline, or invite the user to your meeting with a return invite message
- If you accept an invite while in a meeting, you will automatically exit your current meeting to enter the new one

3. Join a Meeting

- Select Join Meeting from the IGMeeting menu
- Enter a 5-digit meeting code and select Join Existing Meeting to enter meetings in progress
- Click Join Last Meeting to reenter your previous meeting
- Click Join New Meeting to create a new meeting with no other participants

Selecting Meeting Modes

- Video Conference - Send and receive all video views, audio, and data
- Video Conference Viewer - Receive (only) all video, audio, and data
- Video Conference Selective - Start session receiving no video with ability to select from available video views
- Web+Audio Conference - All video capability disabled (for low bandwidth connections)

Multicast is not available on most networks. Use Bridged mode unless otherwise instructed.

inSORS Meeting Controls

Send Volume Control

Move slider to adjust volume or uncheck box to mute

Receive Volume Control

Adjust volume for all remote participants, uncheck box to mute

Local Audio Settings

Restore standard settings, adjust Windows audio settings

Select Standard Microphone Settings or Standard Line In Settings the first time you enter a session.

Remote Site Volume

Adjust volume for each site individually or uncheck box to mute.

Network Status Indicator

Green=OK, Yellow=moderate loss, Red=severe loss
Left=send, Right=receive

Local Video Settings

Set video window layout, toggle video streams, control cameras

Remote Video Control

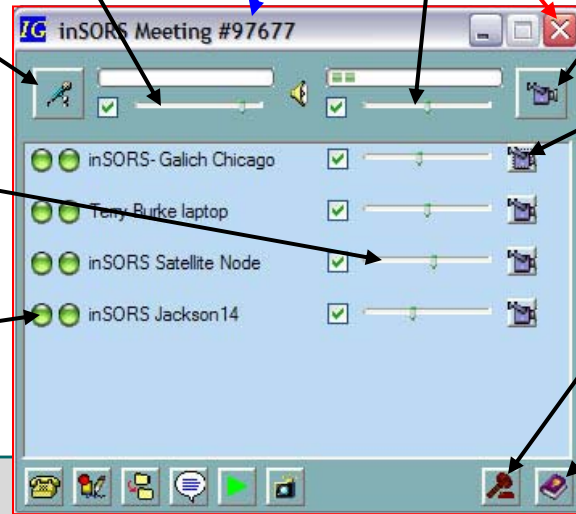

Toggle received streams on and off, control remote cameras

IGModerator

View and extend meeting length

Help Files

Complete how-to guides for all inSORS Grid functions

Collaboration Tools

F1 from any tool window for more information

IGDialer

Dial standard telephones or a teleconferencing bridge

Dial H.323 (IP) videoconferencing systems.

Select any single video window in a session and hit "1" on your keyboard to transmit video to H.323 videoconferencing systems

IGWhiteboard

Co-edit drawings and text

Highlight important content

Save content at each endpoint

Copy and paste text from documents to co-edit - ctrl-c to copy, ctrl-v to paste

IGFile

Share files with authenticated users

Download other users' shared files

Encryption is Automatic

Files are uploaded and saved and then deleted from the server when the owner leaves the session.

IGChat

Text chat during sessions

Select Online user and click Private Chat to chat with only one user

Use ctrl-c to copy and ctrl-v to paste text to and from chat window

IGRecorder

Record video, audio, and streaming desktop media streams

Play archived sessions

Record new meetings that include previous recordings.

IGRecorder captures all video and audio streams

IGPix

Send presentation URL to telephone/VTC participants

Clear Presentation

Set presentation to "Waiting for Presenter" screen. (Presentation will clear when session ends.)

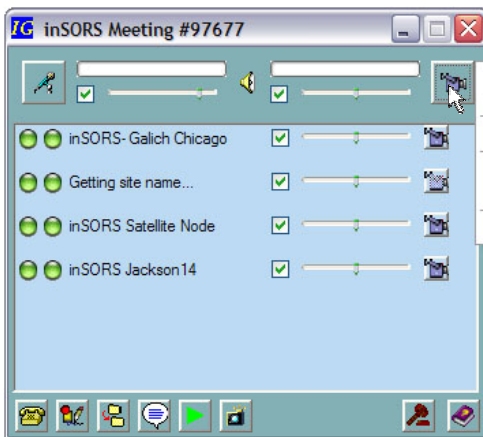

Select Window

Choose single or multiple desktops or applications or windows for presentation content

Update Presentation

Update snapshot of selected desktop/window
Start PowerPoint presentation and advance slides to automatically update IGpix presentation

Video Controls

Camera Control

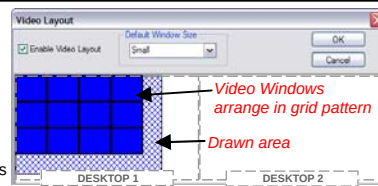

- Select local or remote site
- Select camera
- Make adjustments to cameras
- Click Reconnect if cameras do not appear in list

Controllable cameras are only available in conference room and workstation nodes.

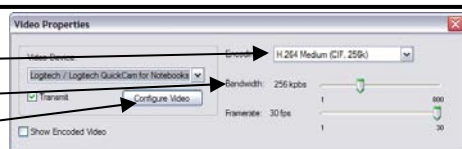

Video Layout

- Check Enable Video Layout
- Select Default Window Size
- Click and drag placement area across white desktop space
- Click OK to place video windows

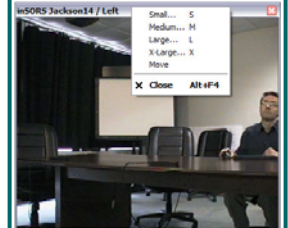

Video Properties (Advanced)

- Select video compression quality
- Adjust local video bandwidth (per camera)
- Adjust video capture device properties

Video Window

Move and place video windows independently
Change size by right-clicking on the top bar
Use keyboard shortcuts to change window sizes (S, M, L, X)

Share Web Pages

Click the IG Toolbar icon in IE to share web pages in a meeting.
