A call for proposals from students, postdocs, and faculty in Atlantic Canada

The Atlantic Computational Excellence Network (see www.ace-net.ca), through its **ACEnet Institute for Materials Modelling and Simulation (AIMMS)**, invites **organizers of seminars, conferences, or workshops to submit proposals for speakers, events, or awards that promote or recognize research in Materials Modelling and Simulation**. Submitted proposals will be considered on an ongoing basis, and will be supported according to need, excellence, and available funds. The levels of support can range from about \$100 for a student book prize up to thousands of dollars for support of international conferences being held in Atlantic Canada. Short proposals can be made by email to any member of the AIMMS steering committee — please include some information about the event, the proposed AIMMS component, and the requested amount (i.e. a budget summary and justification). Additional material will be requested if it is needed. A brief email report is expected after the event.

We hope to support three types of activity that promote **computational materials science** (from the macromolecular to the soft and/or condensed matter). Other activities to promote computational materials science in Atlantic Canada will also be considered.

prizes: book or cash prizes for best student talks or posters or theses on an AIMMS theme.

seminars: AIMMS-style seminar-speakers and/or one AIMMS lecturer per year (touring several ACEnet institutions). Ideally these will be associated with streamed video to other ACEnet universities.

conferences: AIMMS invited speakers at regional, national, or international conferences being held in Atlantic Canada (typically one or two per conference).

Sincerely, the AIMMS steering committee

Prof. Andrew Rutenberg	adr@dal.ca	(chair)
Prof. Peter Poole	ppoole@stfx.ca	
Prof. Keith DeBell	kdebell@stfx.ca	
Prof. Ivan Saika-Voivod	saika@mun.ca	
Prof. Sheldon Opps	sopps@upei.ca	

P.S. We encourage any AIMMS related researchers in Atlantic Canada to join AIMMS and ACEnet by contacting any of us, and to support AIMMS by regularly and widely distributing this call for proposals within Atlantic Canada. Please send it to your local seminar coordinators, and send us your suggestions!
