

Post Doctoral Fellow / Research Associate

The Environmental Sciences Research Centre (ESRC) is a multidisciplinary research and post graduate training centre carrying out fundamental and applied research in Environmental Sciences. Our members belong to seven universities and federal laboratories.

ESRC (St. Francis Xavier University in Nova Scotia) has support available for a Post Doctoral Fellow or Research Associate in the area of regional climate modeling to join an international multidisciplinary team of researchers to work on fundamental climate dynamics and research on renewable energies. Experience in dynamical downscaling will be considered an asset. The position is in principle for one year, renewal for up to 5 years is possible subjected to satisfactory performance.

Candidates should have a Ph.D. in any of the following disciplines: Atmospheric Sciences, Physics, Geophysics, Meteorology, Astrometeorology or related sciences. Demonstrated experience with numerical methods is essential.

The position carries a salary of CAN \$50,000, before taxes are deducted.

Please send resume, a statement of research interest, and the names of three references to:
