

Coast to Coast Seminar Series

A Canada-wide seminar series on topics in Mathematics and Computing Science presented via Access Grid videoconferencing technology.

computer visualization and image processing

September 16, 2008

Dr. Torsten Möller

School of Computing Science, Simon Fraser University

Optimal Regular Sampling and Reconstruction in Three Dimensions

September 30, 2008

Dr. Jim Britten

Department of Chemistry, McMaster University

Visualization of Reciprocal Space - 3D X-ray Diffraction

October 14, 2008

Dr. Richard Levy

Director of Computing, University of Calgary

Topic TBA

October 28, 2008

Dr. Minglun Gong

Department of Computing Science, Memorial University

Real-time Foreground Segmentation from Dynamic Backgrounds on GPU

November 25, 2008

Dr. Pierre Boulanger

Department of Computing Science, University of Alberta

Advanced Collaborative Infrastructure for Real-Time Computational Steering in Scientific Computing

December 9, 2008

Dr. Stephen Brooks

Faculty of Computer Science, Dalhousie University

Artistic Image Processing

3:30 pm Atlantic

4:00 pm Newfoundland

Attend via videoconference from StFXU, SMU, Dalhousie, UNB, MUN, Acadia, MtA.
