

Call for Paper

HPCS 2008

Come to beautiful Québec City for its 400th anniversary!

HPCS is a multidisciplinary conference that focuses on any discipline involving High Performance Computing and its applications. Attended by Canadian and international experts and researchers renowned in the sciences, engineering, mathematics and applied human sciences, it is Canada's preeminent forum for HPC. The 2008 edition will be hosted by Université Laval, in Québec City.

Original papers are solicited on any HPC related topic. Papers will be peer reviewed, and those accepted, either for oral or poster presentation, will be published by IEEE prior to the conference.

Details of the submission process are forthcoming.

Organizing Committee:

Marc Parizeau, Laval (General Chair)
David Sénéchal, Sherbrooke (Program Chair)
Nadia Ghazzali, Laval (Local arrangements)
Nicolas Dubé, Laval (Student challenge Chair)

Important dates:

January 11th, 2008 (submission deadline)
February 25th, 2008 (notification of acceptance)
March 21th, 2008 (receipt of final manuscript)

Much has happened since July 3, 1608, when French explorer Samuel de Champlain established a settlement in a place called «Kébec» - An Algonquin Word meaning «where the River narrows». He might not have realized at the time that this day marked the beginning of a permanent French presence in North America, after several unsuccessful attempts...

For people of French descent, all over America, everything points back to Québec City, recognized as the founding site of French civilization in North America. At one point, Québec City was at the center of an empire, New France, that covered all of Eastern Canada and almost half of the current US territory. French possessions in North America then reached from the Gulf of St Lawrence to the Great Lakes and from Hudson Bay to the Gulf of Mexico.
