

ACEnet Research Fellowships 2009

ACEnet is pleased to announce that the second round of the ACEnet/Sun Research Fellowship (ARF II) program will open for applications in the very near future. Round II of the program will be based substantially on the same objectives and processes that were used in Round I, although modifications are to be made to streamline the application, evaluation and award processes based on feedback from Round I.

The purpose of this announcement is to provide you with advanced warning of ARF II in order that you can prepare for your application.

The objectives of ARF II are:

Increase the number and quality of research personnel involved in high-performance computing at ACEnet Member Institutions.
Facilitate the optimal exploitation of ACEnet's computing infrastructure, leading to research discoveries of international significance.

In Round I of ARF, there were 50 applications and 31 awards for an actual cost of slightly less than \$1M. A total of up to \$1M will be awarded in Round II (approximately \$500,000 in each of year 1 and year 2). Financial support is available for three types of research fellowship:

- Senior Visiting Fellowships
- Postdoctoral Fellowships
- Graduate Fellowships

Our anticipated timeline for the program is release of the formal Request for Proposals on or before February 9th, 2009 with awards by June of this year. If this process can be accelerated, it will be.

Applicants for ARF II must be ACEnet Project Leaders actively using ACEnet's facilities as of the date of proposal call.

If possible, please hold any questions you may have until the Request for Proposals is released, however if you do have any questions that must be answered, please contact fellowships@ace-net.ca
