

## ENABLING RESEARCH IN ATLANTIC CANADA

### Executive Director

The Atlantic Computational Excellence Network (ACEnet) is a world class High Performance Computing (HPC) resource, driving and fostering research, innovation, and progress throughout Atlantic Canada. Operating as a partnership between ten academic institutions throughout the Atlantic Provinces, ACEnet's mission is to provide a distributed technology platform which will enable researchers to gain access to the collaboration tools and high performance computing resources that are necessary to conduct high quality research.

Located at Memorial University in St. John's NL, the Executive Director of ACEnet will lead a team dedicated to enabling e-research and optimizing cyberinfrastructure. Reporting to the Board of Directors, she/he will provide oversight to the management and administration component of the organization while working closely with ACEnet's Chief Technology Officer and the research community to ensure the people, finances, technology, and processes are in place to meet the computing needs of researchers in Atlantic Canada. Other responsibilities include short and long term planning, particularly as it relates to funding and financial sustainability; budgeting and financial reporting to the Board of Directors and funding partners; and vendor relations. Representing the interests of ACEnet on various inter-provincial and national boards, committees, forums, and conferences will become increasingly important as the national landscape is expected to change significantly in the immediate future.

The successful candidate will have at least ten years of progressive leadership and management experience; a graduate degree in business and/or information technology is preferred. She/he will likely have experience working in the public sector, preferably a post secondary education environment, and has worked in or managed an information technology unit. With the ability to work remotely with limited guidance, an appreciation for post secondary research and a demonstrated belief that collaboration and consultation leads to better decisions will ensure success in this role.

To find out more about this opportunity, please contact Lloyd Powell at 709-722-6848 or submit your application online at <http://jobs.kbrs.ca/Careers/9014/>.

**All qualified candidates are encouraged to apply; however, Canadian citizens and permanent residents will be given priority. ACEnet is committed to employment equity and especially welcomes applications from all qualified candidates, including women, men, members of visible minorities, Aboriginal persons, persons with disabilities and members of sexual minorities.**
